

DryMax Floor mat XL

DryMax Floor mat XL quickly and efficiently absorbs water-based fluids such as irrigation fluid, blood, urine and other fluids present in examination and operating rooms. DryMax Floor mat XL is suitable for standing on and can also be placed under a stool.

Placed on a dry floor the blue anti-slip barrier layer keeps the mat in place and prevents fluid from going through. It prevents slips and falls due to wet floor. Ideal to use under sink area. The mats can, depending on what they have absorbed, be disposed of in the usual manner.

Incorporating DryMax Floor mat XL mats into work routine reduces the time and money spent on cleaning as well as allowing for a faster turnover time. In the case of heavy liquid flows DryMax Floor mat XL can successfully be used in combination with DryMax Floor mat 2.4 which is a superabsorbent mat, providing exceedingly high absorbency and retention capacity.

Caution! Place DryMax Floor mat XL on dry floor.

ANTI-SLIP

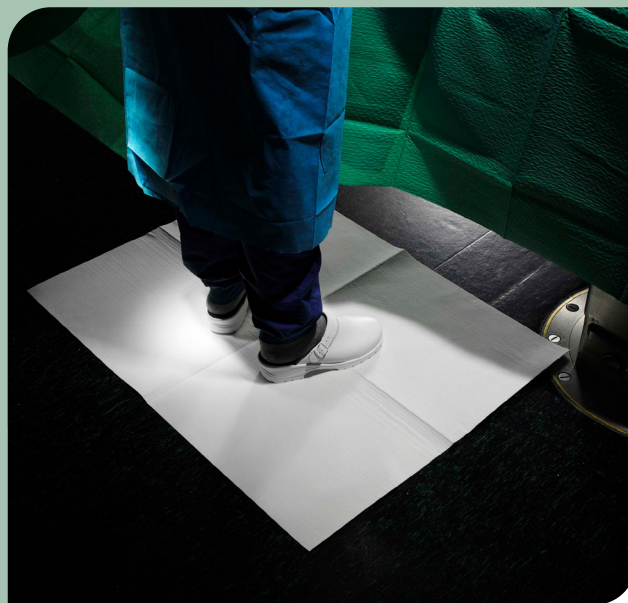

Blue anti-slip barrier towards dry floor

DISPOSAL
Treat as clinical waste, combustion forms carbon dioxide and water

**NOT
MEDICAL
DEVICE**

**NON
STERILE**

AREA OF USE

- Operating room
- Sink/scrub station
- Examination room
- Central sterile

PRODUCT BENEFITS

- Efficient absorption
- Reduces cleaning time & costs
- Anti-slip backing
- Prevents slips & falls
- Faster turnover
